

IDLE NO MORE is not just about First Nations

WHAT YOU NEED TO KNOW:

- ★ **Bill C-45 changed more than 60 pieces of Canadian Law without any debate in parliament**

- ★ **Laws that were changed include the**
 - ★ **Environmental Assessment Act**
 - ★ **Fisheries Act**
 - ★ **Navigable Waterways Act**
 - ★ **Pipeline Act**
 - ★ **Species at Risk Act**
 - ★ **Indian Act**
 - ★ **....and many others.**

- ★ **With changes to the Navigable Waterways Act, almost any body of water can now be dammed up**

- ★ **With changes to the Environmental Assessment Act, industry will be allowed much greater leeway on air and water pollution.**

- ★ **With changes to the Fisheries Act, spawning areas and core fish stocks are no longer being monitored or protected as before.**

- ★ **These changes harm the strength of Canadian law. If a project fails an environmental assessment, the government should not be allowed to simply change the law to suit the project.**

- ★ **These changes were buried within the budget bill (C-45). Most MP's didn't even read the entire bill because it was more than 400 pages long. THIS IS NOT DEMOCRACY. All Canadians must speak up and protest. We cannot allow this underhanded attempt to circumvent the parliamentary process to stand.**
